Innovate. Integrate. Secure.

Empowering Digital Resilience

Based in Mumbai, Vishakha Infotech Private Limited helps organizations build resilient, scalable and secure digital environments.

- IT consulting aligned to business objectives
- Infrastructure design for growth and continuity
- Auditing, cybersecurity and compliance-focused frameworks
- AI audit and governance for systems already in production

ISACA | CISSP | (ISC)² | AAAI | CERT-In

What We Do

Cybersecurity

VAPT, resilience frameworks and proactive risk management.

IT Audits

Expenditure, controls and compliance-oriented audit reviews.

AI Audit

AI readiness, model and workflow audits, and governance reviews.

Infrastructure

Active/passive networking, servers, NAS and enterprise hardware.

Consulting

GAP analysis, roadmaps and implementation governance.

One team.

Security, audits, networks & hardware.

www.vishakhainfotech.com

Our Approach

01

ASSESS

Deep-dive audit, inventory and GAP analysis

02

ARCHITECT

Design secure, scalable network and systems architecture

03

IMPLEMENT

Deploy hardware, networking and security controls

04

SECURE

Continuous improvement, resilience and monitoring readiness

Advanced Cybersecurity

Reduce exposure before threats become incidents.

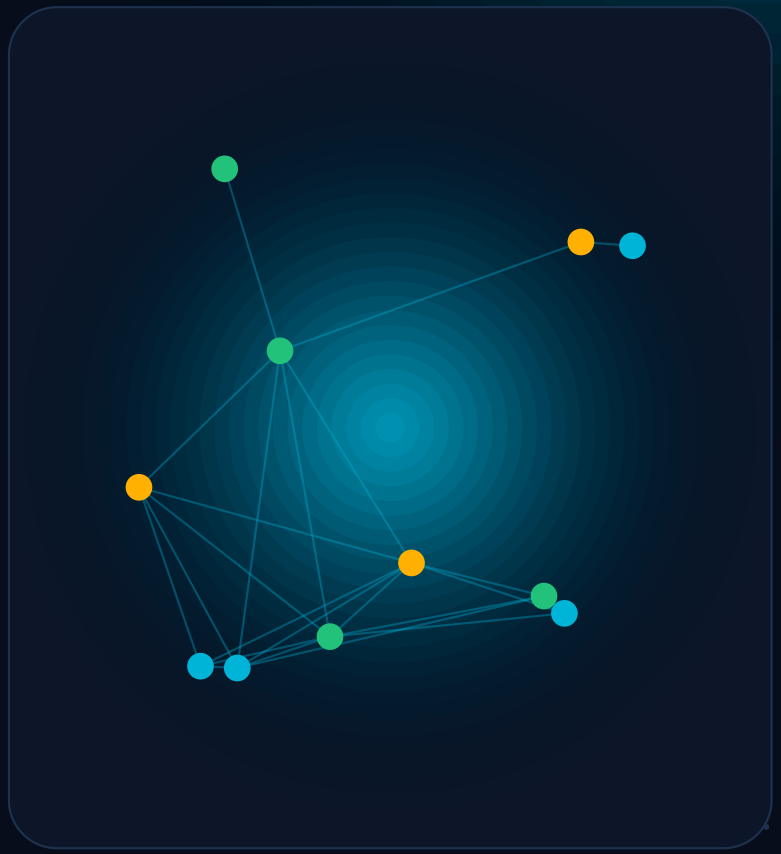

- Vulnerability Assessment & Penetration Testing (VAPT)
- Cyber resilience framework implementation
- Policy, access, endpoint, network and cloud security reviews
- Risk-prioritized remediation roadmap

Infrastructure Foundations

Reliable connectivity is the backbone of every modern enterprise.

- Structured cabling and rack documentation
- Active and passive network architecture
- Optimized switching, routing and Wi-Fi readiness
- Neat, scalable and maintainable deployments

Enterprise Hardware & Systems

Supply, commissioning and optimization of business-critical IT assets.

- Mission-critical servers
- Centralized NAS and enterprise storage
- AV room and collaboration upgrades
- Workstation and endpoint optimization

Security & Operations Impact

35%

measured vulnerability reduction

75%

faster risk visibility after assessment

98%

control improvement focus

Indicative post-assessment outcomes; final results depend on scope, environment and remediation ownership.

The Vishakha Advantage

Single Point of Contact

From hardware to complex security audits, we coordinate end-to-end.

Future-Ready Infrastructure

Solutions planned for scalability over the next 3–5 years.

Practical Governance

Clear documentation, actionable findings and prioritized next steps.

Mumbai-Based Support

Local consulting presence with enterprise-grade delivery discipline.

Service Capabilities

AREA	CORE FOCUS	ENTERPRISE VALUE
Cybersecurity	VAPT & resilience frameworks	Proactive risk management
AI audit	Model, workflow & governance review	Safer, accountable AI use
System audit	ISACA / CISA-standard expenditure review	Operational efficiency
Networking	Security switches, routing & segmentation	High-speed, defensible connectivity
Hardware infra	Servers, NAS, AV & endpoints	Reliable business continuity
Standards	ISACA · CISSP · $(ISC)^2$ · AAAI · CERT-In	Audit-ready, framework-aligned delivery

Is your IT infrastructure ready for the
next audit, cyber threat or growth phase?
